VEGETABLE SEEDS

ASPARAGUS

This is a vegetable which takes several years to develop to the producing stage. Seeds should be sown in early Spring about 2 inches apart and transplanted the following Spring to a permanent location. Plants should be set, in rich or well manured soil, about 18 in. apart and with the crown about 6 in. below the surface. An ounce of seeds should produce about 400 plants. We usually have one and two year old plants for sale in April.

9 Washington Pkt. 10c; oz. 20c; 1/4 lb. 60c; 1 lb. \$2.00

BEANS

Beans is a vegetable every garden should contain, both for use direct from the garden and also for canning or freezing. Easy to grow in almost any kind of soil if not too shady. Easiest method to plant the Bush varieties is to drop 2 or 3 seeds in about an inch deep hole and about a foot between each hill. 1/4 lb. should plant about 80 hills. Another way is to plant the beans in rows 2 ft. apart and about 3 in. between each seed. The Pole Beans can be planted 5 or 6 seeds around a 6 to 7 ft. pole and with the poles at least 2 ft. apart. Earliest seeding when danger of frost has passed or first half of May, and latest seeding about August 1st for green beans.

SWEET CORN

Sweet Corn can be planted when the ground is beginning to warm up and danger of frost is about over. In this environment early May seems to be the earliest. Rows should be 2 ft. apart for the shorter, earlier varieties to 2½ ft. apart for the taller, later kinds. In the rows, hills, with 3 to 4 seeds in each, should be from 1½ to 2 ft. apart according to the variety. In small Home Gardens where space is limited the earlier varieties can be planted somewhat closer. An oz. contains about 100 seeds. We recommend to treat the seeds with Seme-san Jr. before planting.

TOMATO

Tomatoes can be planted 3 to 5 ft. apart or if staked up with stakes or trellis about 2 ft. apart. For Home Gardens and for early Truck crop we recommend growing them on stakes or trellis. Set out when danger of frost is passed. 1 oz. of seed should produce about 2,000 plants. The dates marked after the varieties indicate the approximate days from time the plants are set out to the time when ripe tomatoes can be expected.

FLOWER SEEDS

ANNUALS

SOME ADDITIONS ADDED TO OUR ASSORTMENT OF

Alyssum Minimum is supposed to be more compact than Snowcloth, and should be better in a small or more confined space.

Bell of Ireland, seems to have been gaining in popularity late. It is an odd looking plant in the garden, and can be used quite effectively in arrangements, either green or dried.

Single Aster Helen Weibull is larger than the regular single asters and the color seems different from the other varieties.

Marigold Lemon Drop is shorter and more freeflowering than Yellow Pigmy.

Marigold Dwarf Goldcrest is smaller than Golden Harmony, crested golden yellow, tipped maroon.

Marigold Dwarf Orange Flame is quite similar to Spry but has smaller and more flowers.

Marigold Fandango or Rusty Red is half dwarf and changes color as the flowers grow older.

Perilla Nankinensis is an old plant used for its dark maroon color in carpet beds or borders.

Pansy Felix or Queen Alexandrine is a regular good large Pansy selected so all the flowers have something like cat whiskers toward the center or eye.

Pansy Trimardeau striped is odd in that the flowers have stripes through the petals like a Zebra.

Petunia Pink Frills is a largeflowered dwarf ruffled variety. Not as large as California Giants.

Petunia Popcorn, is a pure white largeflowered Petunia, but does not string so far around as Snowstorm. Flowers about the same size as Snowstorm.

Petunia Pan American Seed Co's. are all good in their different colors, both the singles and the Alldoubles.

Phlox Dwarf Beauty is larger flowered than the old dwarf Phlox.

Salvia Patens is not new but gives a good effect where a blue color is useful.

Zinnia Eskimo is a new loose petaled large zinnia, something of the cactus type and it is almost white.

Zinnia Uniflower Giants has only one flower on top of each plant. Should be a good cut-flower in that the whole plant can be pulled up and the flower then has a stem of 1½ to 2 ft.

Zinnia Blaze is Burpee's this year's introduction and the only flower given the 1954 All American Award.
